

# Discovery Flight

Ever wanted to ride in an airplane?

Wondered what it is like to take the controls and hold the airplane straight, maybe a few turns???

Well the Discovery Flight is perfect for you.

On Your Discovery Flight you will be able to sit in the Co-Pilot seat and monitor all the action as it happens.

See and hear everything your Pilot is doing.

Once up about 1000 feet over Evansville you'll get to see the sights in a whole new perspective, from the Cockpit!

After 10-15 mins in the plane the pilot will describe a few details into piloting the plane, then **GIVE IT OVER TO HIS CO-PILOT.**

That's right you take the controls for about 5 mins taking the plane high over Evansville.

Best of All on the Discovery Flight you can bring up to 2 additional passengers\* to enjoy in the sights with you, and see how well you can pilot the plane.
